Frequency response	10 – 23,000 Hz
Nominal impedance	12 $\Omega$
Sensitivity	102 dB
Cable length	1.2 m
Connector	4-pole mini jack plug, (3.5 mm)

## DESCRIPTION

This business in-ear headset combines the excellent reproduction properties of the dynamic DTX 100 in-ear headphone with a high-precision condenser microphone. The headset can be connected to all standard MP3 players and MP3 mobile phones (also Apple iPhones with small jack) with the special 4-pole mini jack plug (3.5 mm).

The in-ear design provides undisturbed communication by using one of the three different ergonomic pair of silicon ear pads. Ambient noise is efficiently attenuated, which is a great advantage when the musical qualities of the MMX 100 are required. With the supplied special clip the cable can be attached to the clothing of the user.

The beyerdynamic style softcase is used for transport of the MMX 100 (with small flash players and mobile phones even including player). In order to express the acoustic aesthetics visually, the weight-optimised light metal housing of the MMX 100 has been refined with a gleaming surface in high-grade steel look.
